

Charter Chatter

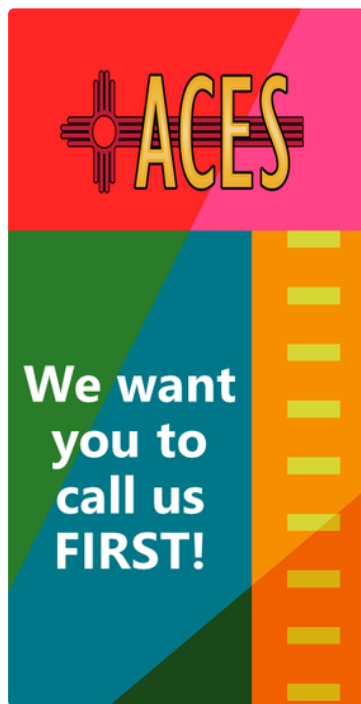

May 2021

A Collaborative Newsletter between ACES and PCSNM

Notes from the Executive Director of ACES, Christy Takacs

Hey Charter Leaders and Friends! As you are wrapping up your budgets in preparation and looking forward into next school year, I wanted to remind you of the many services that ACES currently has available for you. Our valued partners care about your needs. As a member of ACES, our vendors will work to offer you valuable services and products at an affordable, discounted rate. When your school encounters a need, **give us a call to see how we can help!** The ACES family has connections across our state that could potentially fill the gap! We are working at building up our Charter Marketplace program, seeking out vendors who care about Charter Schools and offer relevant, quality services and products. Be on the lookout for New Vendor Introductory emails coming your way! ACES Marketplace program helps to connect Charter Schools to preferred vendors who want to support you! Visit our website or give me a call ANYTIME!

- Facility Financing

Services

- Substitutes
- Employment
- Job Fair
- Facilities Maintenance

PCSNM Update from Matt Pahl

On behalf of PCSNM, I'd like to congratulate you on making it to the tail end of an arduous year. Students have benefitted greatly from the perseverance of you and your staffs, and charter schools have proven once again that their flexibility and responsiveness to their community creates meaningful impact. With this in mind, we'd like to invite you to the next round of a series of roundtables we are collaborating on with the Public Education Department. Part of the CSP grant, this roundtable will focus on how administrators can make the most of their summer. Making the most of summer includes taking a break and spending time to reflect, as well as planning for how best to continue on with some of the positive changes we've implemented since March 2020. The final roundtable of the year will be hosted on May 26th from 3:00-4:30. You'll see invites from both PCSNM and the Charter Schools Division this week. Thank you for the work you've done for New Mexico's students.

Professional Cadre - Robert Abney

Robert Abney has been a member of ACES professional cadre since his retirement from traditional schools in 2019. He has a wealth of administrative experience, including 19 years as an administrator at all school levels. In addition to providing support for charter schools through ACES, he has spent much of the past six months working with the SWREC providing support for state LEAs on the implementation of the MLSS process. His greatest areas of expertise and passion include school leadership and collaborative practices that support student learning. You can reach out to Robert through ACES or by email at abneyad@yahoo.com.

Preferred Vendor Highlight

[RoofCARE](http://www.roofcare.us) is a full-service commercial roofing contractor that specializes in extending the life of existing roofing systems as a cost-efficient and sustainable alternative to premature roof replacement. Our services include roof inspections/diagnostics, leak repairs, preventative maintenance, corrective repairs, service contracts, roof renovation, roof replacement, and wall renovation.

Auri Vigil, Marketing Manager

SmartCare - A Division of RoofCARE

SmartCARE Facility Services, a Division of RoofCARE, is a licensed reseller of Synexis. The Synexis BioDefense system provides automated and continual microbial reduction of air and surfaces. This is accomplished through the deployment of two units, Sphere and Sentry. The Sphere is designed for small areas such as a classroom while the Sentry is designed for larger areas with higher ceilings such as gyms and cafeterias. Both units are powered by standard 120 electricity and can be wall-mounted or remain portable. Designed to operate 24 hours a day. Using ambient humidity and oxygen naturally present in your environment, the technology creates a safe level of hydrogen peroxide (H₂O₂) gas, which reduces unwanted microbial contamination in the air and on surfaces.
